asset generation prompts.

The Floating Bubbles

Three circles suspended in independent orbit. Not locked to a grid, not clustered tight — each bubble breathes in its own space, held together by equal golden-ratio gaps. Community, Sovereignty, and Knowledge: each sovereign, each connected.

COMPOSITION

Three solid circles of distinct size — small, medium, large — float in independent orbit: small upper-left, medium upper-right, large lower-centre. The negative space between them is deliberate and equal. This is the visual language of independence-in-community.

BREATHING ROOM

Every pairwise gap is equalised — each edge-to-edge gap identical, set by a golden-ratio unit. This equal breathing room is what makes the bubbles float rather than cluster. Remove it and the mark collapses into a clump.

PROPORTION

The radii follow the master mark's proportions — 1.00 : 0.74 : 0.56, a near-golden descent. No two circles match in size; none touch. The eye reads three living things, not a fixed icon.

ANCHOR

The wordmark remains Playfair Display Black (900) — serif gravity anchoring the airy mark: float above, foundation below.

ATTRIBUTE	VALUE
CIRCLE RATIO	Large 1.00 · Medium 0.74 · Small 0.56 Measured radii from master mark. A near-golden descent ($\phi \approx 1.618$).
SPACING PRINCIPLE	Equal golden-ratio gaps — floating, never touching Every pairwise edge gap is identical. This equal breathing room is non-negotiable; it is what makes the bubbles float.
BUBBLE POSITIONS	Small upper-left · Medium upper-right · Large lower-centre Organic suspension. The composition has weight at the base and lift at the top.
WORDMARK TYPEFACE	Playfair Display — Black 900 High-contrast bracketed serif. Open licence (Google Fonts).

Mark Geometry

Construction grid, radius ratios, and the equal-gap system that keeps the bubbles floating.

- 01 Radius ratio $L : M : S = 1.00 : 0.74 : 0.56$, taken directly from the master mark — a near-golden progression.
- 02 All three pairwise edge gaps are equal (dashed gold lines). This single constraint produces the floating quality.
- 03 The large bubble carries the visual weight at lower-centre; the two smaller bubbles lift the composition upward and to the right.
- 04 The mark lives in a 100×100 viewBox with the cluster optically centred — not mathematically centred, but balanced for visual weight.

Twelve Configurations

Every configuration uses the identical floating-bubble geometry. Only colour, orientation, and context change — the bubbles and their equal gaps never do.

 01 — HORIZONTAL PRIMARY COBALT · CREAM GROUND	 02 — HORIZONTAL REVERSED CREAM · INK GROUND	 03 — GOLD PREMIUM INK GROUND · FORMAL
 04 — STACKED MARK ABOVE · DIGITAL	 05 — MARK ONLY COBALT · APP ICON	 06 — MARK ONLY WHITE · COBALT GROUND
 07 — SAFFRON SOVEREIGN GOVT-FACING · FORMAL	 08 — FOREST TECH DEV DOCS · FDE PROGRAMME	 09 — WORDMARK ONLY MINIMAL · PRINT · WATERMARK
 10 — BILINGUAL LOCKUP TAMIL + ENGLISH · GOLD	 11 — OUTLINE / EMBOSS WATERMARK · STAMP · FOIL	 12 — FULL BRAND LOCKUP TAGLINE · FOREST GROUND

The Sovereign Palette

Six colours, each with a cultural rationale and deployment context. Cobalt is primary. Gold is reserved. Saffron is sovereign. Forest is technical.

					
INK #0A0A0A	COBALT #1840D8	GOLD #C49A38	SAFFRON #E07828	FOREST #1B4A2E	CREAM #F8F5EF

COLOUR	USAGE CONTEXT
 COBALT #1840D8	Primary mark colour — all standard applications References the Indian Ocean trade routes and Tamil Nadu sky at altitude. Authoritative, not corporate.
 GOLD #C49A38	Premium, bilingual & government-formal lockups Reserved for state contracts, founding documents, diaspora collateral. Chettiar gold, temple metalwork.
 SAFFRON #E07828	Sovereign identity — state government contexts only Never casual. Carries the weight of Indian sovereignty tradition. Government-facing only, never marketing.
 FOREST #1B4A2E	Technical, developer & FDE programme materials Documentation, the Training Curriculum, GitHub assets, the Foundry sub-brand.
 CREAM #F8F5EF	Primary background — print & document applications Warmer than white. References Tamil manuscript paper and handmade Sivakasi paper goods.

COLOUR PAIRING RULE

Cobalt bubbles sit only on Cream or white. On dark grounds (Ink, Forest, Cobalt) the mark reverses to Cream. Gold appears only on Ink. Saffron always pairs with Ink — never with Cobalt.

Serif Hierarchy

Two typefaces, one system. Playfair Display carries titles and the wordmark. EB Garamond carries all body copy and captions. No sans-serif. Ever.

Correct Applications

The mark is a covenant, not a decoration. These rules encode the values of the commune.

✓ CORRECT USE

- Preserve the equal gaps between bubbles in every reproduction.
- Use the full lockup wherever space $\geq$ 120px wide.
- Use Cobalt bubbles on Cream or White only.
- Use the reversed (cream) version on all dark grounds.
- Use Gold only for government documents and founding materials.
- Keep clear space of one large-bubble diameter on all sides.
- Scale the whole viewBox uniformly — never move bubbles individually.

✗ PROHIBITED

- Never close, shrink, or unequalise the gaps between bubbles.
- Never let the bubbles touch or overlap.
- Never rearrange the bubbles or change their size ratios.
- Never use fewer than all three bubbles.
- Never stretch, skew, or rotate the mark.
- Never add shadows, gradients, or glows to the bubbles.
- Never substitute the wordmark typeface.

MINIMUM CLEAR SPACE

← 1× LARGE-BUBBLE DIAMETER CLEARANCE ON ALL SIDES →

THE SOVEREIGNTY RULE

The Yazhi mark may never appear on material produced by or for a foreign technology company, foreign cloud provider, or any platform hosting Indian citizen data outside India — in perpetuity, regardless of commercial relationship.

AI Image Prompts

Production-ready prompts for Midjourney, DALL·E & Stable Diffusion — each encodes the floating-bubble geometry and palette.

PROMPT 01 — PRIMARY LOGO · MIDJOURNEY / DALL·E 3

Subject: Minimalist logo for “Yazhi” technology company. **Mark:** Three solid cobalt circles (#1840D8) floating with equal breathing space — NOT touching. Small upper-left, medium upper-right, large lower-centre. Ratio 1.0 : 0.74 : 0.56. **Text:** “Yazhi” in Playfair Display Black serif, deep black, right of mark. **Style:** Clean white ground, flat solid colour, no gradients/shadows, Swiss graphic design, institutional authority.

--ar 1:1 --style raw --v 6 --no texture gradient shadow ornament line

PROMPT 02 — APP ICON · DARK THEME

Subject: App icon for “Yazhi” sovereign AI platform. **Mark:** Three white circles floating on deep ink-black (#0A0A0A). Small upper-left, medium upper-right, large lower-centre. Generous EQUAL negative space between bubbles — they float. **Style:** Flat geometric, no gradients, pure circles, icon-grid balance.

--ar 1:1 --style raw --v 6 --no text font gradient shadow connecting-line

PROMPT 03 — BRAND POSTER · CULTURAL / SOVEREIGN

Subject: Sovereign technology brand poster for Yazhi, India. **Layout:** Editorial A3. Three cobalt bubbles floating top-left with airy gaps; “Yazhi” in massive 120pt serif bottom-right. **Colours:** Cream #F8F5EF ground, cobalt #1840D8 bubbles, gold rule. **Mood:** Sovereign — a government seal on handmade paper, subtle grain.

--ar 2:3 --style raw --v 6 --no photography person face clustered-dots

PROMPT 04 — LINKEDIN / OG BANNER · 1200×628

Subject: Professional tech LinkedIn banner for Yazhi. **Layout:** Wide horizontal. Left: cobalt bubbles, equal gaps. Centre: “Yazhi” heavy serif. Right: “Sovereign Technologies” caps. **Colours:** Ink-black #0A0A0A ground, cream text, cobalt bubbles.

--ar 1200:628 --style raw --v 6 --no photo illustration touching-circles

PROMPT 05 — OFFICIAL SEAL · GOVERNMENT DOCUMENTS

Subject: Official seal for Yazhi Sovereign Technologies. **Mark:** Circular seal. Outer ring: “YAZHI SOVEREIGN TECHNOLOGIES · INDIA ·” spaced caps. Centre: three cobalt bubbles, equal gaps. Below: Tamil யாழி. **Style:** Engraving aesthetic, single cobalt ink on cream, stamp quality.

--ar 1:1 --style raw --v 6 --no colour-fill photo shadow 3d

Why Floating Bubbles

Why bubbles, not a grid?

A grid is a corporation: rigid, hierarchical, locked. Floating bubbles are a commune: independent, breathing, held together by relationship rather than rule. The equal gaps say that no node dominates another — each holds its own space, none drifts away. The form is the philosophy.

Why three?

Three is a number of deep Tamil resonance — the Three Sangams, the three kingdoms (Chola, Chera, Pandya), the Kural's three books (Aram, Porul, Inbam). Three is always relational in Tamil thought: never singular, never a pair. Three is the smallest number that makes a community.

Why a serif?

The choice is political. Every Indian institution of permanence — the Constitution, the Reserve Bank, the Supreme Court, the IITs — uses serif letterforms. Serifs carry the weight of time. Yazhi is not a startup chasing a round. It is a long-term sovereign institution, and should look like one from day one.

Why cobalt?

Neither the flag (presumptuous) nor a tech giant's palette (derivative). It is the blue of the Indian Ocean — the route of the ancient Tamil trade guilds — and of the submarine cables that now carry digital sovereignty. The blue of Madurai sky at 5am, before the heat arrives and the city wakes to build.

“We are not building a startup. We are building a movement with a business model. We are not employees of India's digital future. We are its architects.”
